

BIG BLUE BALING TWINE

Big Blue round bale twine is one of SilaFARM's signature twines and a long-time favourite for general purpose large round baling. Each spool of Big Blue encompasses strength and a long running length, which makes it a great all-rounder in the large round bale twine market.

Designed for Australia's tough baling environment, Big Blue's combination of strength and longer running length makes it the ideal general purpose twine for use in all modern conventional round balers; baling low to medium density round bales.

Big Blue is designed to suit contractors and farmers/end-users for use in crop types such as Pasture, Cereal, Straw & Silage.

FEATURES AND BENEFITS

- Incandescent blue fibre
- Superior UV resistance
- 6000m Length spools - Maximise baler machine runnage
- Reduces time spent in the field
- Designed for Australian conditions with 12 Month Guarantee against UV degradation
