

FORTE

FORTE is a high strength, high-performance Netwrap designed for the Australian straw, hay and silage market. Its rugged construction provides extra strength for springy crops that would normally need extra wraps of conventional Net to carry out the same job.

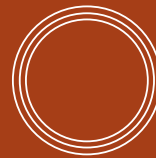

When the going gets tough, FORTE has proven to be a strong, reliable Netwrap and consistent performer in the Australian market many seasons.

FORTE achieves secure crop protection in complete round bales of straw, hay or silage in all crops. Using the correct tension on the Netwrap will aid full bale coverage. Check baler manual for maximum allowable widths of net.

FEATURES AND BENEFITS

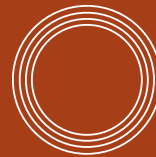

- Stronger, wider chains, giving to the edge coverage in 1.23m & 1.30m widths
- Designed for springy, high pressure, straw, hay and silage round baling in modern high capacity machines
- Manufactured from the latest generation of high quality resins for high pressure and tear resistance
- Designed for Australian conditions with 12 Month guarantee against UV degradation

NETWRAP APPLICATION RATE

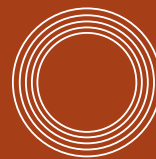

SILAGE

Layers on the bale: 3

HAY

Layers on the bale: 4

STRAW / CEREAL HAY

Layers on the bale: 5

It may be necessary to increase the number of turns depending on the baler, bale pressure, bale diameter and crop conditions.
