

PREMIUM SILAWRAP ULTRA - 5 LAYER

Our new generational film is designed specifically for all high speed wrapping machines and increasing bale weights. SilaWRAP Ultra is produced on a new state of the art extruder, and combines 20 blended resins to produce a premium quality, consistently performing, silage film.

The resin combinations produce a film with even and consistent stretch, significantly increased puncture resistance and ease of application.

Film tack properties have also been improved to provide excellent bonding of the film layers making better anaerobic conditions.

Produced by Integrated Packaging, a world leader in the manufacture and supply of wrapping solutions for the agricultural market, Integrated Packaging was the first in the world to stretch wrap silage bales and also designed, manufactured and patented the world's first bale wrapping machine in 1984.

FEATURES AND BENEFITS

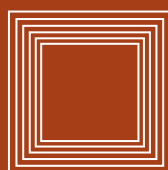

1. Made in Australia, for Australian Conditions
2. 5 Layer Co-Extruded Film with extra high tack levels for superior performance
3. Evenness of stretch to provide superior oxygen barrier properties supporting the fermentation process
4. Designed specifically for the heavy demands of High Speed Wrapping Machines
5. Manufactured from a special blend of resins to maximise resistance to puncturing
6. Designed for Australian conditions with 12 month guarantee against UV degradation

APPLICATION RATE

ROUNDBALES

Layers on the bale: 6
50% Overlap
Stretch: 70%

SQUAREBALES

Layers on the bale: 6+
50% Overlap
Stretch: 55%

TUBELINE

Layers on the bale: 6-8
90-100mm overlap
Stretch: 55%

Storing bales for over 12 months, we recommend adding an additional few wraps to ensure an anaerobic environment.

NEW CODE	OLD CODE	DESCRIPTION	WIDTH (mm)	LENGTH (m)	MICRON (µm)	COLOUR	ROLLS / PALLET	APPROX BALES PER ROLL
59752005	SIL0044	SilaWRAP ULTRA	750	1,500	25	GREEN	40	22

* Approx number of bales per roll based on a 1.2m x 1.2m round bale with 6 layers at 70% Stretch
