

SilaTWINE HD

DON HD+ - HIGH DENSITY

DON HD+ is a specialised twine for high-density large square baling and has been specifically designed for the higher pressure applied in the new HD Balers.

DON HD+ is certified for use in all the current model HD balers. Its multi tape and heavily fibrillated construction process, with a uniform round diameter, guarantees a less abrasive run through the baler while maintaining superior knot holding properties.

FEATURES AND BENEFITS

- High tensile strength
- Excellent knot holding properties increased
- Strength and run-ability in HD Balers
- Designed to prevent knot slippage
- Withstand higher pressure/density allowing more fodder in the bale
- Designed for Australian conditions with 12 months minimum UV protection

USAGE AND APPLICATION

Designed to withstand the higher pressures applied in new HD balers, DON HD+ significantly lowers fodder conservation costs from 'Paddock to Stock'.

DON HD+'s superior strength maximises bale weight and compression, making it the perfect choice for use in all HD balers and suitable for use on all hay or silage and straw crop types.
