

SilaTWINE HD

FEATURES AND BENEFITS

- Superior knot holding capabilities
- Designed to prevent knot slippage
- Withstand higher pressure/density allowing more fodder in the bale
- Designed for Australian conditions with 12 months minimum UV protection

GREAT WHITE XD - HIGH DENSITY

Great White XD is a specialised twine for high density large square baling and was specifically designed for the higher pressure applied in the new HD Balers. Great White XD has been verified by the leading baler manufacturers, such as Massey Ferguson, Claas & Krone for use in all of the current model HD balers. Its single tape, heavily fibrillated construction, guarantees a less abrasive run through the baler, while maintaining superior knot holding properties.

USAGE AND APPLICATION

With Great White XD's superior knot holding properties to maximise bale weight and compression, combined with additional metres per spool, Great White XD is a perfect choice for use in all HD balers and crop types.

NEW CODE	DESCRIPTION	UOM	LENGTH / PACK (M)	COLOUR	PALLET QTY	BALE / PACK 6 STRING	BALE / PACK 8 STRING
