

Introducing **Butterfly**

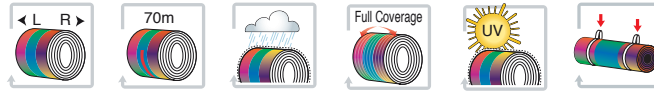

SMALL CHANGE · BIG EFFECTS

**a new generation
of net wrap**

More on
Butterfly

Butterfly's ME+ Technology takes net wrap performance one step further. Not only improving performance in the field but significantly increases ease of use with 5% plastic reduction.

The Benefits of ME+ Technology

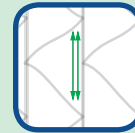

► **Better cling on the crops**
The ME+ Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME+ netwraps hook up fast and easily.

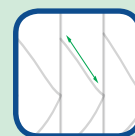

► **A Step Ahead for Net Wraps**
ME+ not only improves performance in the field but significantly increases ease of use and respect for the environment.

► **Mesh with fewer knots**
Knots are the critical points of any thread. Novatex ME+ netwraps have half the number of knots with respect to standard netwraps.

► **Thicker & Stronger chains**
Novatex ME+ mesh is made of stronger and thicker threads, ensuring higher strength and more ability to withstand repetitive handling.

► **Flexible geometry**
The reduced number of tension points (knots) aid natural movement of the weft, leaving it free to stretch in width.

Butterfly is made to work more easily and quickly
