ME+ Exclusive Technology

► Medium-sized mesh

ME+ is a performing solution that allows to produce net wraps made of a reduced number of chains with reinforced and thicker threads.

► Higher Specific Strength

ME+ technology gives the threads an incredibly superior Specific Strength. This means: perfect protection of the forage over time.

► Better cling on the crops

ME+ Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME+ net wraps hook up fast and easily.

► Mesh with fewer knots

Knots are the critical points of any thread. Novatex ME+ net wraps have half the number of knots with respect to standard net wraps.

► Eco Friendly

The proven increase in strength of Novatex ME+ nets allowed a significant reduction in the use of plastic while maintaining the highest standards available.

SilaNET MAX is the newest netwrap in the Agri Novatex range. It's the result of a major enhancement in the manufacturing process.

This new generation netwrap combines superior strength and holding capabilities with lighter and longer rolls. SilaNET MAX is perfect for medium to high density hay and silage crops, which makes this netwrap the best choice for farmers and contractors looking for a multipurpose netwrap.

Due to an enhanced weaving process that increases the netwraps relative strength to weight ratio, SilaNET MAX with ME+ technology allows an increase in roll length whilst the strength and weight of the roll remains the same. This brings a huge benefit when baling with reduced roll changes for the same number of bales, helping to improve on-farm efficiencies.
