

BUTTERFLY

A new generation of net wrap

SUSTAINABLE INNOVATION

This cutting-edge net wrap is designed with a focus on three key elements:

- Memory Compression Technology
- Eco-friendly
- Adaptability to suit all balers and conditions

PRODUCT SPECIFICATIONS

WIDTH (m)	LENGTH (m)	ROLLS/PALLET	BALES PER ROLL		
			3 wraps (silage)	4 wraps (hay)	5 wraps (straw)
1.23	3,150	32 (2x16)	279	167	134
1.3	3,150	32 (2x16)	279	167	134
1.23	4,200	32 (2x16)	372	223	179

*Based on 1.2m bale for silage and 1.5m bale for hay and straw.

FEATURES

1. Memory compression technology
2. Thicker and stronger chains
3. A step ahead in protection
4. All balers, all conditions
5. Eco friendly
6. Mesh with fewer knots

BENEFITS

1. Holds the bale tight creating a firm shape and improving watershed
2. Ensures higher strength and ability to withstand repetitive handling
3. Built to withstand Australia's harsh UV climate and contains high chemical resistance formulation
4. Compatible with various baler models and versatile in all crop types.
5. The highest specific strength to weight ratio gives Butterfly net the edge in performance with less kilograms = 5% plastic reduction.
6. Butterfly netwraps have half the number of knots giving you half the breakage points.

APPLICATION TIPS

Getting the best out of your netwrap

Pre-season maintenance

Prior to using your baler, best practice maintenance ensures productivity of your Butterfly netwrap:

1. Ensure all baler belts, chains and rollers are free of crop residue
2. Check all bearings and chamber belt roller
3. Ensure netwrap components are clean and well greased
4. Ensure net knife comprises a sharp edge

In-season maintenance

Daily checks of your baler prior to use will guarantee performance

1. Clearing debris and crop residue from around belts and sensors
2. Check and fill all baler chain lubrication systems and grease points
3. Ensuring net knife springs are in good order without distress from wear and tear
