EFFICIENT. RELIABLE. UNIVERSAL.

Utilising high chain technology, Starnet HC spreads from edge to edge and is a great option for all crop types and balers.

ECONOMICAL:

Manufactured to provide a cost-effective netwrap solution. Perfect choice for those needing a standard weight netwrap that delivers excellent value.

UNIVERSAL APPLICATION:

Designed as an all-round net, Starnet HC is suitable for use in all conditions and compatible with all types of balers makes and models.

DURABLE AND RELIABLE:

Starnet HC technology ensures integrity and strength, providing secure and reliable wrapping.

APPLICATION TIPS

Getting the best out of your netwrap

PRE-SEASON MAINTENANCE

Prior to using your baler, best practice maintenance ensures productivity of your Butterfly netwrap:

1. Ensure all baler belts, chains and rollers are free of crop residue
2. Check all bearings and chamber belt roller
3. Ensure netwrap components are clean and well greased
4. Ensure net knife comprises a sharp edge

IN-SEASON MAINTENANCE

Daily checks of your baler prior to use will guarantee performance

1. Clearing debris and crop residue from around belts and sensors
2. Check and fill all baler chain lubrication systems and grease points
3. Ensuring net knife springs are in good order without distress from wear and tear
